Summary

Graduate in MSc Machine Learning and Data Mining with experience across bioinformatics, NLP, and computer vision. Experienced in building interpretable deep learning models, with a background in data analysis, model optimization, and software development.

Education

| | |
|-------------------------------------------------------------------------|---------------------|
| MSc Machine Learning and Data Mining , University of Jean Monnet | Aug 2023 – Sep 2025 |
| MSc Computer science ERASMUS+ semester , University of Freiburg | Oct 2024 – Mar 2025 |
| B.E Computer Science and Engineering , SVCE, Chennai, India | Aug 2017 – May 2021 |

Experience

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| AI Researcher, Intern , IBDM, Marseille | April 2025 – Aug 2025 |
| <ul style="list-style-type: none">Designing interpretable large language models (LLMs) to classify cellular states from bulk and single-cell RNA-seq data. Integrating explainability frameworks (e.g., SHAP, attention maps) to identify key genes influencing cell differentiation.Outcome: improved classification accuracy and biological interpretability by >5% vs baseline models. | |
| Student Researcher, Part-Time , Bioinformatics Group, Albert-Ludwigs-University – Freiburg, Germany | Nov 2024 – March 2025 |
| <ul style="list-style-type: none">Built a BERT and GRU based deep learning pipeline predicting neoantigen immunogenicity on experimentally validated datasets. Achieved 80% classification accuracy. | |
| Machine Learning Researcher, Intern , Laboratoire Hubert Curien – Saint Etienne | April 2024 – July 2024 |
| <ul style="list-style-type: none">Enhanced graph learning models by incorporating screening-based sparsity methods, reducing runtime by 10–20%. Contributed to research on interpretable structured learning under varying optimization constraints. | |
| Programmer Analyst , Cognizant Technology Solutions – Chennai, India | July 2021 – Aug 2023 |
| <ul style="list-style-type: none">Engineered and deployed full-stack web applications using Angular, JSP, and SQL Server for enterprise clients. Collaborated across 4 agile teams as DevOps Developer managing databases (Postgres, MongoDB) and build pipelines. | |

Projects

[Neoantigen Immunogenicity Prediction](#) – BERT & GRU-based classifier trained on 20k+ samples
[Structured Generation from Call Transcripts using FastAPI and LLaMA](#) – Built an API to automatically generate structured summaries from customer call transcripts.
[Transfer learning using ResNet](#) - Finetuned a pre-trained ResNet model on the MNIST dataset
[Forest Cover Type Classification using SVM](#) - Implemented SVM achieving 85% accuracy
[Performance Analysis of KNN on Waveform Dataset](#) - Benchmarked KNN under noisy conditions.

Skills

Programming Languages: C, C++, Java, Python, Angular
Data Science: Data Collection, Data Processing, Data Analysis, Data Visualization, Machine Learning, Artificial Intelligence, Natural language processing (NLP) – LLMs, Computer vision,
Deep Learning frameworks: PyTorch, Tensorflow, Keras
Frameworks & Libraries: OpenCV, Sci-kit learn, NumPy, Pandas, SciPy, Matplotlib
Tools: Git, MSOffice, Maven, Udeploy, Apache Subversion, Docker, Blender, HPC
Natural Languages: **English:** Fluent, **French:** Beginner, **German:** Beginner, **Tamil:** Native
